

# HSBC Life Assurance (Malta) Ltd

## HLM European Equity Fund

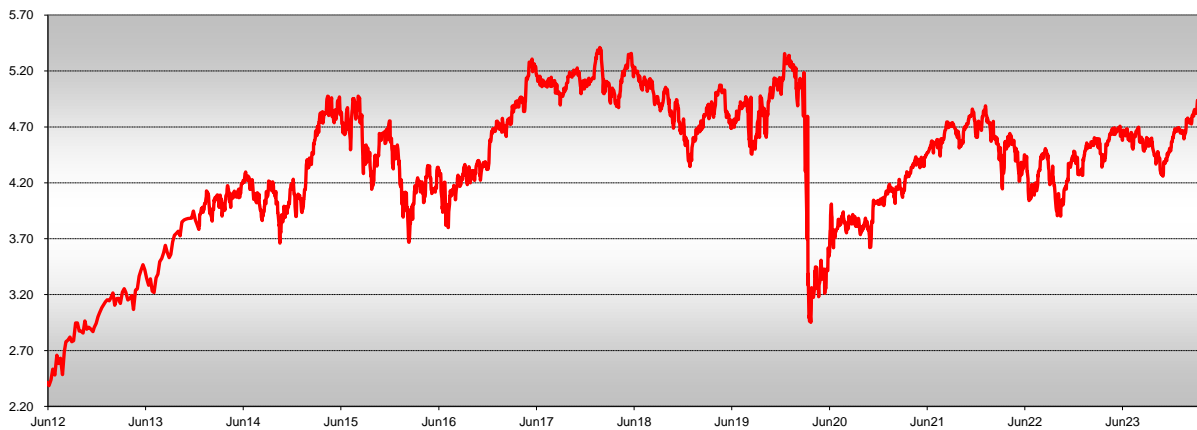

Fund No 10

HLM Fund Info Sheet As At: 29 March 2024

### Investment Objectives

The Fund seeks to achieve long-term capital growth by primarily investing in equities of companies domiciled in, or exercising the predominant part of their economic activities in Europe. Exposure to securities is achieved through investment in an underlying fund or funds. Currency risk arises from fluctuations in the value of the euro against the base currency of the underlying fund. The underlying fund may invest in financial derivatives, other financial instruments and engage in leverage which may result in the overall risk exposure of the underlying fund to exceed their total net assets. For the full investment objectives, investment policy and risk factors of the underlying fund please consult the current prospectus. For operational purposes the HLM Fund may hold a proportionately small amount of its holdings in cash. When replacing an underlying fund the HLM Fund may also retain all its holdings in cash for the short period required between receipt of settlement price and execution of the buy order.

### Performance History of EUR (Bid Price)

### Cumulative Performance

Last 3 months	Last 6 months	Last 12 months	Last 3 years	Last 5 years	Since Launch	Annualised since launch (*)
6.91%	12.75%	12.14%	17.12%	3.23%	126.63%	3.37%

(\*) The annualised rate shows the average return per year since the fund's launch. Past Performance Rate is shown net of Annual Fee but excludes any other charges and taxes. Past performance should not be seen as an indication of future performance, and the value of the investment can go down as well as up. Currency fluctuations may affect the value of the investment. Any sharp fluctuations in the performance of the fund over a period of time are not necessarily represented by the performance rate or by the annualised rate indicated.

### Calendar Year Performance (Last 10 Years)

2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
1.9%	10.9%	3.8%	9.9%	-13.3%	18.1%	-21.8%	17.9%	-10.9%	8.5%

Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past.

This chart shows the fund's performance as the percentage loss or gain per year over the last 10 years.

Performance is shown after deduction of ongoing charges. Any entry and exit charges are excluded from the calculation.
