

HSBC ESG video transcript

Our World

there's so much going on all the time
and everything we do
has a consequence
including how we use our money.

All over the world,
people are investing to secure a good future for their families
but they also care about a good future for our planet.

And people like my mum and dad care -
they care about my future.

Sustainable investments are becoming more mainstream.

More and more people want to talk to someone who knows about this stuff,
so they can make the right decisions on how to invest to grow their wealth
and at the same time, take action to help fix big problems.

This is the time.
To find out more, see "Why ESG Matters".

Sustainable Investments are the future

HSBC, Together we thrive.
